

ProjectFlow

A Modern Project Management Platform

OUR FEATURES

Everything you need to manage tasks effectively

Our powerful features help teams stay organized and deliver projects on time

The Problem With Existing Tools

- Most tools are either too complex (steep learning curve)
- Poor fit for student teams & capstone workflows
- Overpriced or over-engineered for small teams
- Weak task-level access control for academic integrity

What ProjectFlow Solves

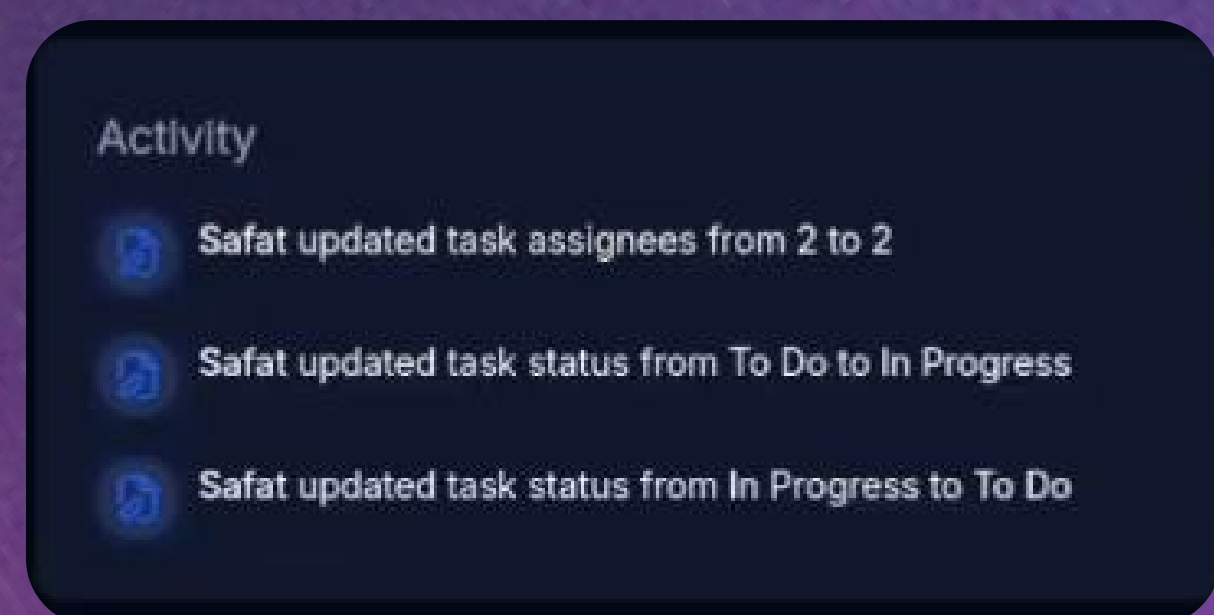

Clear hierarchy: Workspace → Project → Task

Real-time visibility without overwhelming complexity

Built-in collaboration instead of scattered communication

Designed for clarity, accountability, and flow

Why ProjectFlow Is Better Than Competitors

Simple Kanban board, lacks reporting.

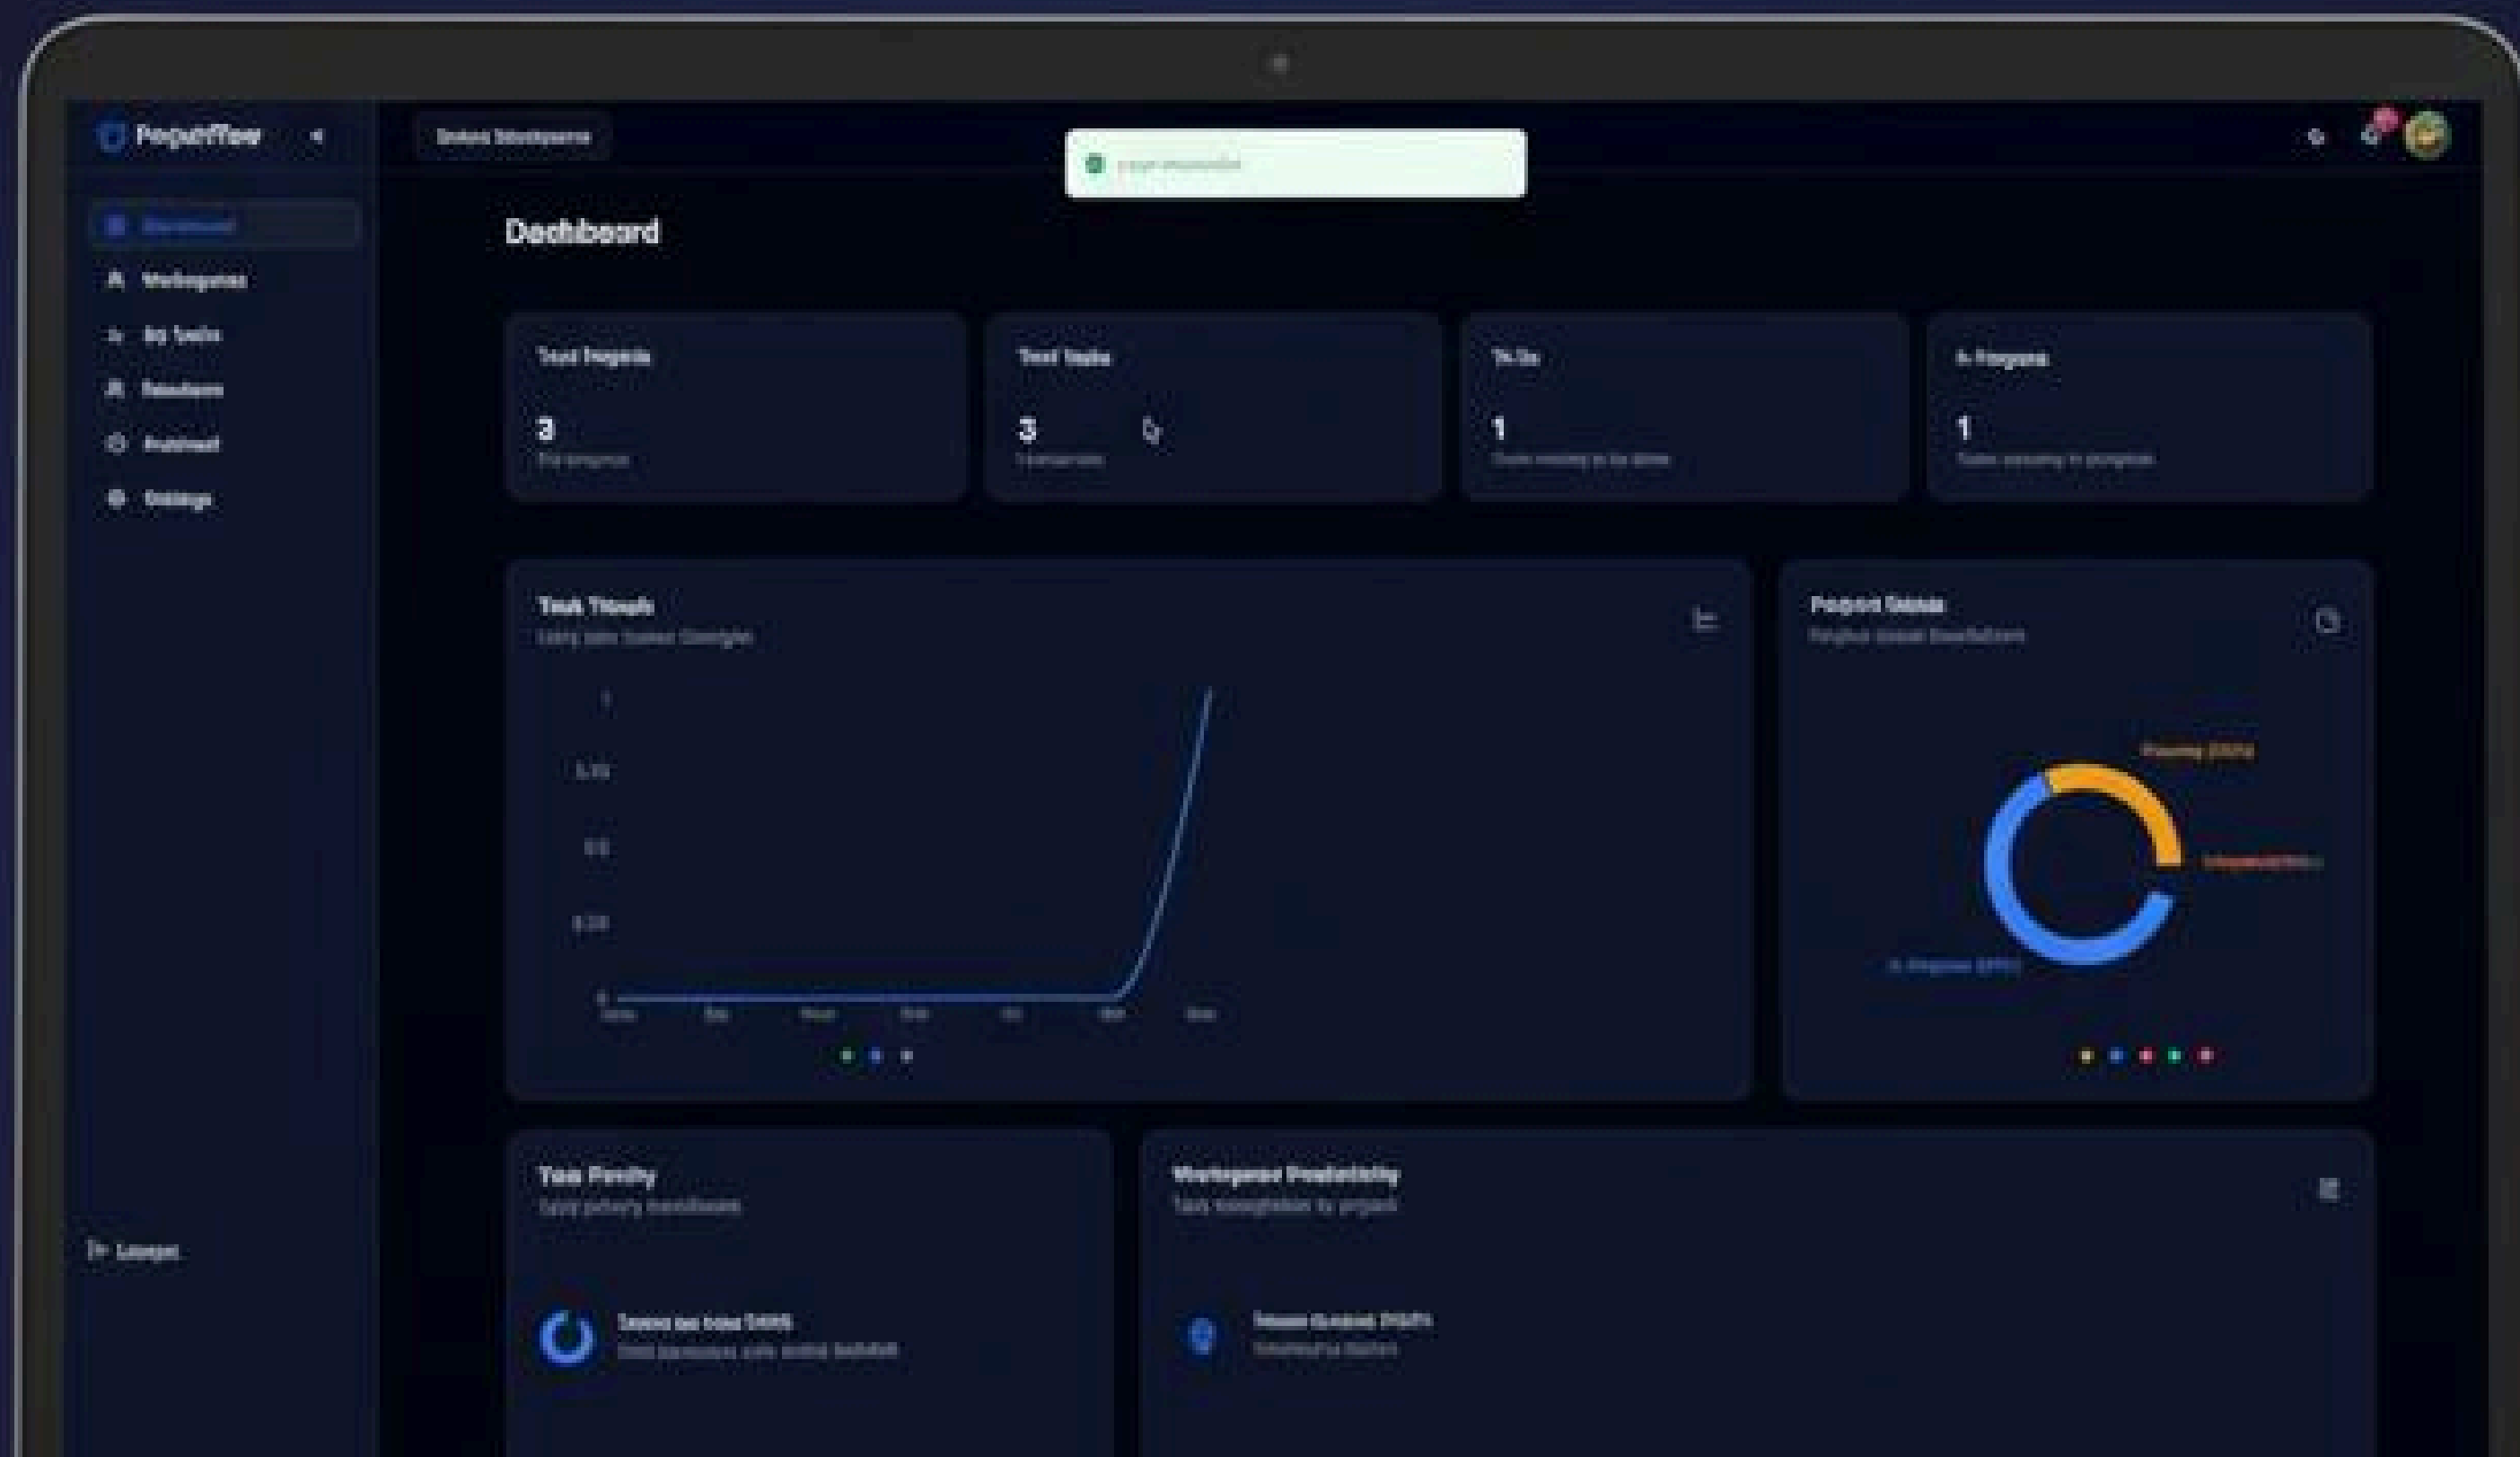

Advanced but overwhelming for new users.

Outdated UI, slow performance.

Features That Actually Matter

- Secure authentication (JWT + Google OAuth)
- Workspace & project member management
- Task priorities, due dates, and progress tracking
- Real-time notifications that are contextual
- Archive & restore instead of destructive deletes

Built for Teams
& Companies

- Clear accountability through assignments
- Transparent progress tracking (0–100%)
- Reduced miscommunication with comments & mentions
- Scalable architecture for growing teams
- Secure by design, not patched later

Why Universities Should Use ProjectFlow

- Ideal for capstone project groups
- Faculty can monitor progress without micromanaging
- Prevents free-riding via task-level visibility
- Clear separation of roles within student teams
- Mirrors real-world project workflows students will face

Conclusion

Building ProjectFlow throughout the semester gave us hands-on experience in designing a complete, real-world system—from planning and collaboration to implementation and refinement. The project reflects our growth as a team and our understanding of how modern project management tools should actually work. ProjectFlow stands as a strong foundation with the potential to grow beyond the classroom and into real-world use.

THANK YOU
