

Group-3 | CSE299.4
Safat Uddin (2311966642)
Farhan Karim (2311790642)
Faizur Rahman Zunayed (2312137642)

Backend

Done by Safat:

- Implemented **Google OAuth**, allowing users to sign in or sign up using their Google accounts.
- Implemented the **Notifications system**. Users now receive notifications when:
 - Users are added to a project
 - The project description is updated for a project they are part of
 - Users are assigned to a task
 - The task description is updated for a task user is assigned to
 - Attachments are added to a task users are assigned to
 - Another user comments on a task users are assigned to
- Added **profile picture functionality**: users can upload or remove their profile picture from their account.

Frontend

Done by Zunayed:

- Implemented the **task due date selector** button in the task description page.

Done by Farhan:

- Implemented the **notification UI**, including a dropdown that displays all notifications for the user.
- Implemented the **dark & light theme switching** using a toggle button.
- Implemented the UI for uploading and displaying **profile pictures**.
- Added the “**Continue with Google**” button on both the sign-in and sign-up pages.

Done by Safat:

- Implemented **React Query hooks** to handle data fetching and mutations, with automatic cache update after changes.
- Built the **Google OAuth interface** for sign-in and sign-up.
