GENTLE REMINDER OF
WHAT WE ARE BUILDING

A Modern Task Management Platform for Corporate Teams

PROGRESS

Launched in 2010

BASED ON

PROS

- ✓ Very intuitive and quick to adopt for many teams.
- ✓ Integrations via “Power-Ups” (third-party extensions) launched around 2016.
- ✓ Simplicity and visual ease are major selling points.

CONS

- ✗ When scaled to large corporate teams with many members/projects, some users find it lacks advanced hierarchy, roles, or enterprise-level analytics.
- ✗ Limited features for complex projects, lack of native time tracking and task dependencies, and scalability issues for large teams or organizations

MS Project

Launched in 1984

TECH STACK BASED ON

PROS

- ✓ Deep scheduling and resource management capabilities
- ✓ Long history and many features built over decades.

CONS

- ✗ Less focus on real-time collaboration for being primitive technology
- ✗ Steep learning curve for non-project-management specialists making it limiting to a certain group of users.

Launched in 2017

TECH STACK BASED ON

PROS

- ✓ Very rich feature set; attempts to combine many tools in one.
- ✓ Good for teams wanting one platform for tasks + docs + chat.
- ✓ Agentic flow with rapidly growing features

CONS

- ✗ With so many features comes complexity; some users report steep learning curve.
- ✗ Full of bugs due to overly complex architecture and lack of optimization
- ✗ Not suitable for day to day task management activities due to being overly technical

Launched in 2002

TECH STACK BASED ON

PROS

- ✓ Customizable workflows, strong integrations.
- ✓ Scalable for large teams, with role/permission frameworks.

CONS

- ✗ For non-software teams, some features may feel overly technical or less user friendly.
- ✗ limited reporting capabilities
- ✗ Can also be slow, especially with many issues or complex workflows

KEY TAKEAWAYS

For simplicity & visual clarity but lack of enterprise features

Mature tools but lacks modern UI workflow and user experience

Still new and has a lot of bugs and might seem overwhelming to non-technical people

For simplicity & visual clarity but lack of enterprise features

OUR OBJECTIVE

To build something that is a combination of the good features of all the existing products focusing mainly on a good user experience

THANK YOU
